

TOWING A FORD VEHICLE BEHIND A MOTORHOME

FOUR-WHEEL-DOWN TOWING • TOW-DOLLY TOWING

Four-Wheel-Down Towing

Many motorhome owners prefer the practicality of having another vehicle along when they travel. In fact, towing another vehicle behind the motorhome has become more and more popular in recent years. Furthermore, many of those who want to tow another vehicle prefer one that can be easily towed without a dolly or trailer.

The chart on this page shows which car, truck and SUV models can be towed with all four wheels down. For safe operation, towed vehicles (or dollies or trailers carrying them) should be equipped with a separate functional brake system. See pages 3 and 9 for additional brake information.

Note: Some aftermarket camper centres offer kits which may allow vehicles with automatic transmissions to be flat-towed. (Four-Wheel-Down Towing is sometimes referred to as "Flat Tow" or "Flat Towing.") Check your new vehicle Warranty Guide, as this could void the warranty of your vehicle.

FOUR-WHEEL-DOWN AVAILABILITY

2026 FORD CARS	Automatic Transmission	Manual Transmission
Mustang – All Models	No	No
2026 FORD ELECTRIC VEHICLES		
Mustang Mach-E	No	N/A
E-Transit	No	N/A

F-150 Raptor Pickup 4x4	Yes ⁴	N/A
F-250/350/450/550/600 Super Duty 4x2	No	N/A
F-250/350/450/550/600 Super Duty 4x4	Yes ⁴	N/A
Transit	No	N/A
E-Series Cutaway/Stripped Chassis	No	N/A

1. Maximum speed with hybrid transmission is 112 km/h. 2. Select "Neutral Tow" mode – refer to Owner's Manual transmission and towing sections to follow procedures. 3. Start the engine and allow it to run for a few minutes at the beginning of each day and every six (6) hours or fewer, thereafter. With the engine running and your foot on the brake, shift into drive (D) and then into reverse (R) before shifting back into neutral (N). 4. Place the transfer case in the neutral tow position to engage the four-wheel-down towing feature – refer to Owner's Manual to follow additional steps. 5. Requires 2-speed transfer case.

N/A – Not Applicable.

INDIVIDUAL VEHICLES HAVE DIFFERENT RESTRICTIONS AND TOWING PROCEDURES. REFER TO THE VEHICLE OWNER'S MANUAL OR CONTACT YOUR FORD DEALER FOR COMPLETE DETAILS.

Tow-Dolly Flexibility

Tow-dollies allow you to tow your vehicle behind a RV or motorhome if you are unable to four-wheel-down your car, SUV or truck. Tow-dollies work by elevating the vehicle's front drive wheels and resting them securely on the dolly while the back two wheels stay on the ground. They are not as long as the traditional trailers, which helps make turning corners easier.

Before using the tow-dolly, read the manufacturer's instructions that came with the tow-dolly before towing, loading or unloading the dolly.

- Attach the appropriate trailer hitch and drawbar hardware to the vehicle for the tow-dolly
- Attach the tow-dolly to the drawbar. The tow-dolly should be completely secure and on level ground before the vehicle to be towed is put on or taken off the tow-dolly
- Drive the vehicle onto the tow-dolly with its front wheels
- Secure the vehicle to the tow-dolly according to the manufacturer's instructions
- Follow the instructions for attaching and connecting the auxiliary lights to the back of the vehicle being towed
- Test the auxiliary lights to make sure that the turn signals, stop lamps and running lights work properly
